EMERGING TECHNOLOGY

Jennifer Melot
Senior Software Engineer

Jennifer Melot is a Senior Software Engineer at Georgetown's Center for Security and Emerging Technology (CSET). Previously she worked in the Artificial Intelligence Technology and Systems (formerly Human Language Technology) group at MIT Lincoln Laboratory, supporting work for government sponsors in areas including pronunciation modeling and feedback, data management and review, and test and evaluation of human language technology systems. She holds an S.B. from MIT, where she double-majored in Computer Science and Linguistics.
